---

## Career Objective

I'm looking for a MERN Stack Developer role where I can combine my passion for coding and design to build amazing websites and web apps. I love staying up to date with the latest web technologies to ensure every project I work on is modern, efficient, and user-friendly. I thrive in collaborative environments where creative ideas turn into real solutions, and I'm always eager to learn and take on new challenges. My goal is to create seamless and accessible digital experiences that make a real impact.

## Technical Skills

**Expertise:** HTML | CSS | Bootstrap | Tailwind CSS | JavaScript | ES6 | React.js

**Comfortable:** React Router | Firebase | MongoDB | REST APIs | ExpressJS | Node.js

**Familiar:** JWT | Tanstack-Query | Next JS

**Tools:** VS Code | Git | Figma | Pixso | Netlify | Vercel

## Projects

### BhaloKaj (Volunteer Management Website)

[Live Link](#) | Github > [Client](#) | [Server](#)

**Description:** A user-friendly platform that simplifies managing volunteer opportunities, making it easy to create, update, and discover meaningful roles.

**Used Technology:** React.js, Tailwind CSS, Firebase Authentication, Express.js, MongoDB, JWT

**Features:**

1. The system makes it simple for users to create, update, and manage volunteer opportunities using an easy-to-navigate interface, ensuring everything runs smoothly and clearly.
2. Volunteers can effortlessly browse through roles and sign up, connecting with meaningful opportunities that help make a real difference in the community.

### GameEcho (A Game Review Application)

[Live Link](#) | GitHub > [Client](#) | [Server](#)

**Description:** GameEcho is all about bringing gamers together in a space where they can easily discover new games, share their thoughts through reviews, and connect with others who share their passion.

**Used Technology:** React.js, Tailwind CSS, Firebase Authentication, Express.js, MongoDB

**Features:**

1. Users can easily browse and share detailed game reviews with smooth navigation and interactive features, enjoying a seamless experience on mobile, tablet, and desktop.
2. Users can also sort and filter reviews by genre, year, or rating to find exactly what they're looking for.
